

Press Release

Martin Doerken presents photographic works at Kunst10Daagse in Bergen (NL)

October 17 – 27, 2025 | EcoDorp Bergen

Photographer and Designer Martin Doerken presents a selection of his latest photographic works as part of the Kunst10Daagse in Bergen. The images were created in the dune landscapes around Bergen and Schoorl – places where nature, light, and vastness merge into quiet compositions.

In his photographs, Doerken captures the unique atmosphere of this coastal landscape. Working with long exposures in the darkness of night, he explores the interplay of light, movement, and time. His approach shifts between carefully planned compositions and a free, experimental process that leaves room for play and unexpected discoveries.

The exhibition will be on view from October 17 to 27, 2025, at EcoDorp Bergen, a sustainable living and cultural project that forms part of the annual Kunst10Daagse art festival.

Visitors are warmly invited to meet the artist in person and experience his work in this authentic setting.
